week 15	Final release

What App ?

Note Your Life 1.0

TigerWeapon released this on 20 Apr · 38 commits to master since this release

This edition contains three main features:

- Login
- Register
- Take photos

Note Your Life 2.0

TigerWeapon released this 11 days ago · 38 commits to master since this release
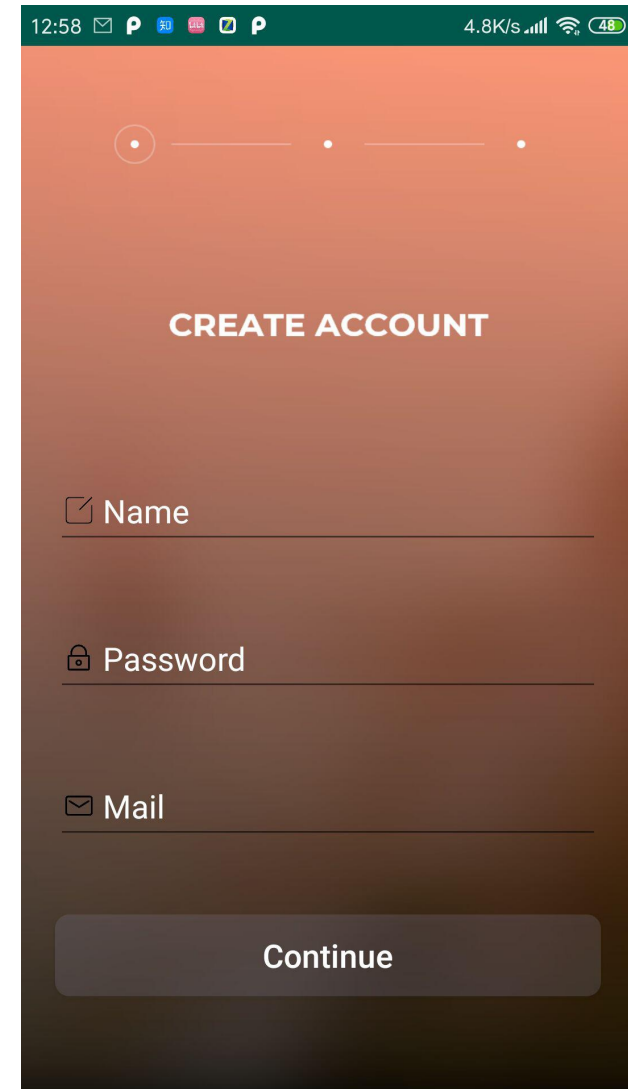

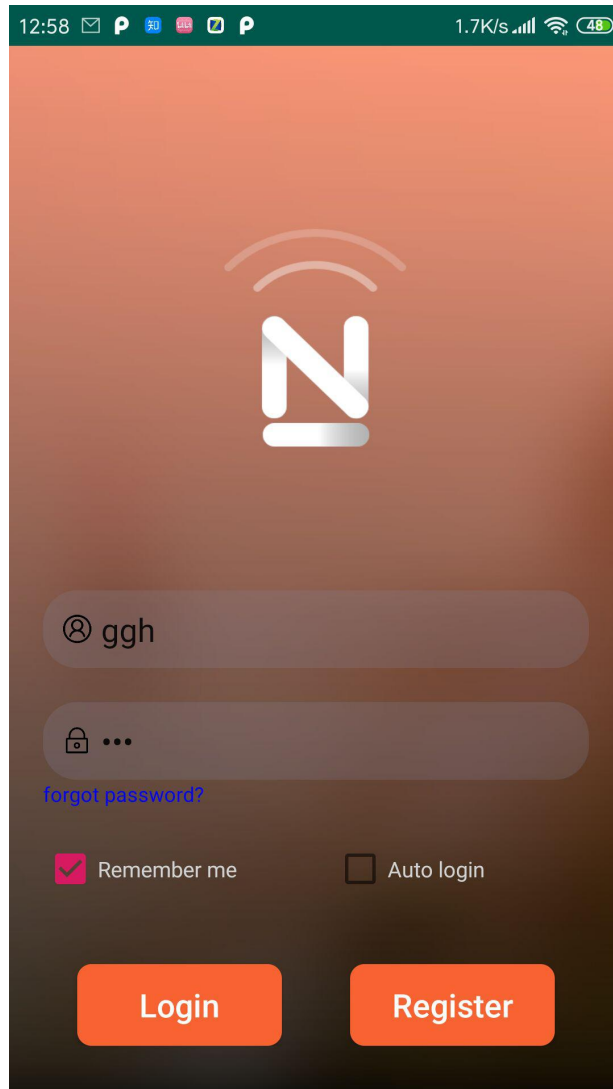

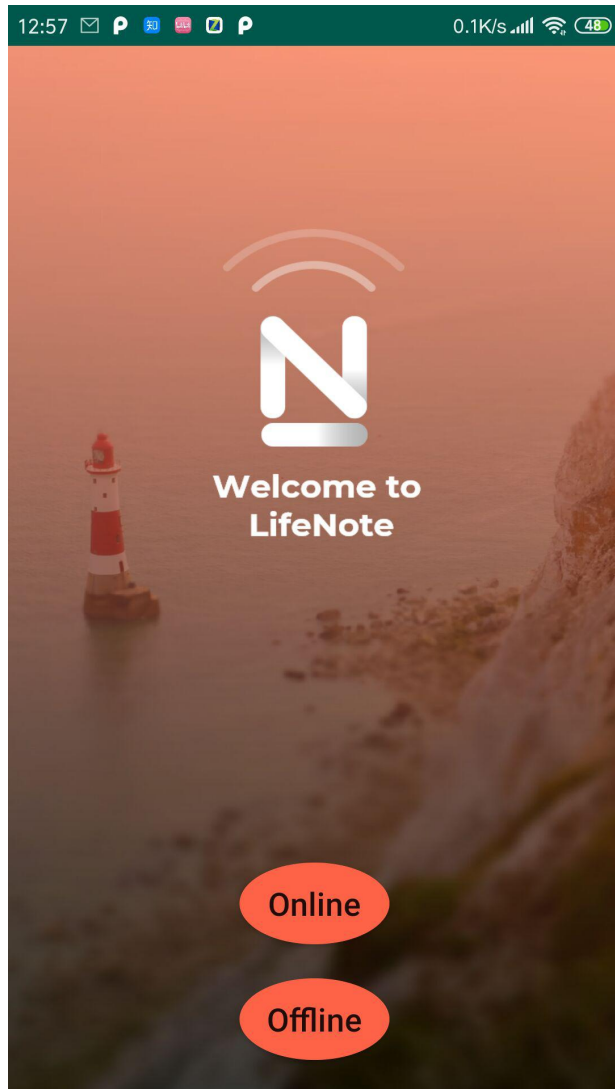

This edition contains three main features:

- Find password back
- Open album
- Select photos from album and display

Optimize following features:

- Register: confirmation mail
- Add two icons in the main interface

We follow the Time line roughly

- We absolutely followed the Time line in version 1.0
- Before we released version 2.0, we found some bugs in two features, so we decide to release them later. But we optimized our register features
- Finally we finish 12 features in this APP

What App ?

How is the App?

Where App use for?

- Save notes in different devices
- Taking notes in the classroom without hand-writing(take a picture of the blackboard or PPT)
- Save your previous hand-writing notes in the cloud

Next?

- Increase more features
  - Share notes …etc
- Improve rate of identification
  - Tensorflow training model
- optimize UI interfaces

Thanks to SE project

- We learnt a lot
  - MVP model
  - Usage of git
  - Android UI development
  - Unit test
  - Communication between back-end and front-end
  - Tensorflow
- We were hurt a lot
  - Imcompatibility problem caused by Android fragmentation
  - Handle unit test in coupling situation
  - Interface jump
  - Data transmission
